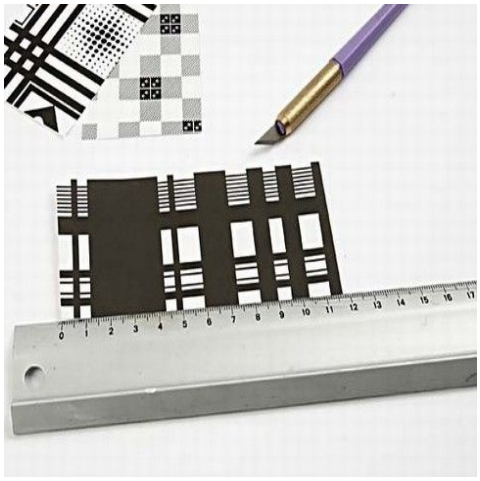
Sleutelkoord

Een sleutelkoord gevlochten van bedrukt papier met stijlvolle patronen. Bevestig verpakkingstape aan het papier, vouw vervolgens en vlecht.

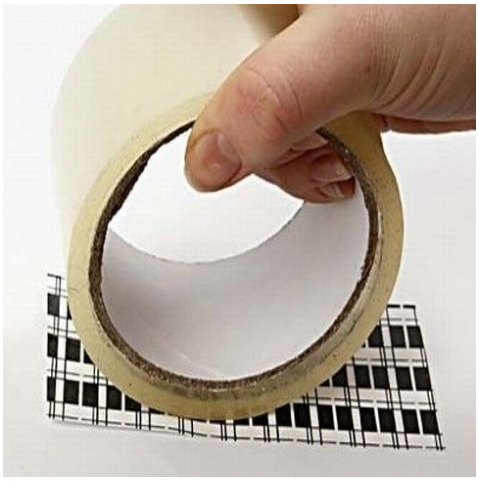
STEP BY STEP 1 2 3

Inspiration: 11656



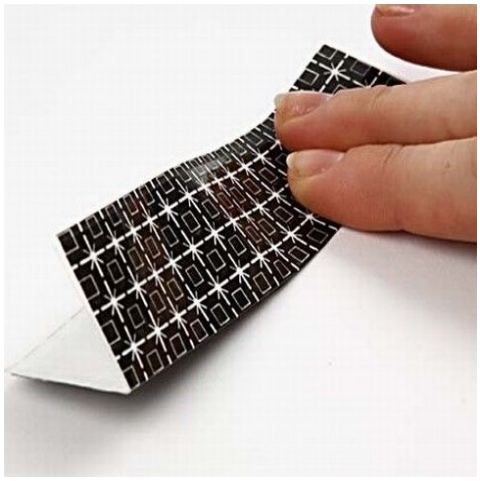
1

Cut pieces of paper measuring 12 x 5.5cm. For this key chain we have used 48 pieces of paper.



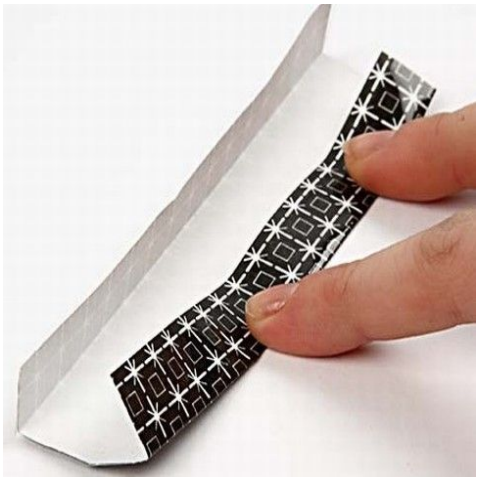
2

Attach clear packaging tape to all the strips of paper.



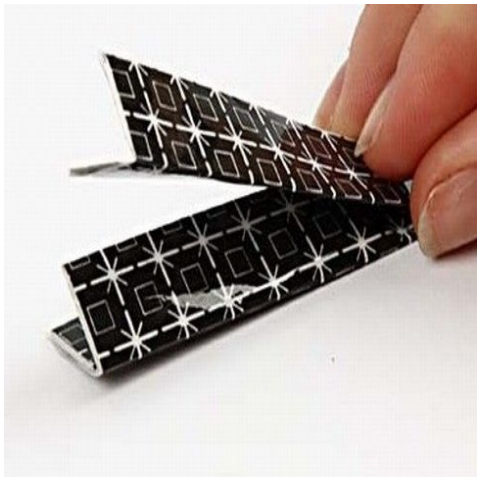
3

Fold lengthwise in the middle with the tape side out and “iron” the fold with a bone folder.



4

Fold the two sides lengthwise to the middle.



5

Fold together and fold over in the middle.

6

Fold the two sides in to the middle. Note that each link has an "easy" and a "difficult” side. On the "easy" side there are 4 layers of paper and on the "difficult" side there are 8 layers of paper.

7

Insert one link into another link from the easy side.

8

Insert the third link from the easy side and continue like this.

9

After a row with 47 links, close with number 48.

10

Attach a key ring and a swivel clasp.
